PROJECTS

DeFiPay (Currently Working)   *Nextjs, Nodejs, Solidity, Express,Blockchain, Hardhat*

- **Decentralized,secure and transparent peer-to-peer** payment platform
- DeFiPay enables users to send and receive payments directly with each other.
- **Features**: Send and Receive payment, Request amount, view Transaction history, view Balance

Drive Clone   *Reactjs,Ipfs,Solidity, Hardhat,Web3Storage*   https://unrivaled-fox-a98f65.netlify.app

- Decentralized file storing app utilized Ipfs to store files and data in a decentralized manner.
- Ipfs enables seamless sharing and allow peer-to-peer sharing,regardless of their geographical location.
- **Features**: Store, Retrieve and share file , User control who can view their data

TECHNICAL SKILLS

Languages	:	JavaScript, C++, Solidity
Frameworks	:	Reactjs, Hyperledger Fabric, Hardhat, Express, Nodejs
Libraries	:	, Redux, React Router, Ether.js
Databases	:	MongoDB,Ipfs,Blockchain
Dev Tools	:	Visual Studio Code, Git, Gitlab

EDUCATION

Sir M Visvesvaraya Institute of Technology   Bengalurr, karnataka, India
Bachelor of Information Science   *2020 – 2024*

PROFILES

- LeetCode Profile (solved 200+)
- Git profile
- gfg profile

ACHEIVEMENT/CERTIFICATES

- Complete Coursera Defi opportunities and Risks course
- Complete Coursera Blockchain Basics course
- Finalist in inCode 2023 — Challenging injustice Organize by Hackerearth
